Family Enhancement Unit

About Us

The Keyanow Family Enhancement Unit works with individuals, family and community to create safe, healthy and nurturing environments where children, youth and families can learn and grow together.

The FEU works closely with the Child Protection Unit to identify families experiencing challenges that may put them at risk of becoming involved in the child welfare system and in need of supportive services.

The program offers crisis support and case management services to ensure that the family at risk receives the supports and services that they need to manage those challenges and difficulties that put them at risk.

Services include advocacy, referrals and connection to community based support services and resources, and continued assessment and monitoring to ensure that service needs are being met. Additional services include home visits, individual and family counselling, and support through educational awareness and group activities.

Goal:

Our goal is to help families to make positive choices:

- Live healthy lifestyles
- Build on family strengths
- Become aware of their situations
- Regain parenting skills
- Gain Independence
- Begin healing themselves and their families

To benefit those who matter most!

The Ones that matter most are the Children. They are True Human Beings.
